

## ABSTRACT

5     **PEPTIDE ANALOGUES COMPRISING AT LEAST ONE TYPE OF  
AMINOACYL AZA- $\beta^3$ , AND THE USE THEREOF, IN PARTICULAR FOR  
THERAPY**

---

10     The object of the present invention is analogues of peptides or parent proteins,  
these peptide analogues, comprising at least one aza- $\beta^3$  aminoacyl residue, and also  
their uses in pharmaceutical compositions or for the diagnosis of pathologies wherein  
the aforesaid peptides or parent proteins are involved.
